

C73® Prismatic Diffusion

(aka Prismatic, Overall Spread Lens, Large Pebble)

Thickness: 5/32" (4mm)
Maximum Size: 48" x 102"

Crystal 73® is used for a range of lighting applications-effectively blending, spreading and diffusing transmitted light.

Features

- Low iron optically clear glass which offers maximum transmission and minimal absorption
- Retains colorlessness and clarity over time unlike plastic lighting components which can yellow
- Can be fully heat tempered to increase thermal shock resistance and mechanical strength
- Widens beam spread approximately 55 degrees
- Can be fabricated to any shape or size under 48" x 102"
- Readily available of the shelf in MR11 1.370" diameter and MR16 1.965" diameter sizes
- Can be coated with a UV Blocking coating or a dichroic color coating
