

## Solite® Softening

**Thickness: 1/8", 5/32", 3/16"**  
**Maximum Size: 48" x 120"**

Solite® glass is a low-iron, rolled product formed with a stippled pattern on one surface. The stipple effect provides the desired obscurity while retaining high transmission values.

### Features

- Low iron optically clear glass which offers maximum transmission and minimal absorption
- Retains colorlessness and clarity over time unlike plastic lighting components which can yellow
- Can be fully heat tempered to increase thermal shock resistance and mechanical strength
- Can be fabricated to any shape or size under 48" x 120"
- Readily available of the shelf in MR11 1.370" diameter and MR16 1.965" diameter sizes
- Can be coated with a UV Blocking coating or a dichroic color coating
